

WT3932 Toroidal Coil

- **Features:**
- Compact dummy choke can be made for greater efficiency
- Cost-effective design
- Less power loss and minimum thermal effect to peripheral components
- Perfectly matched to power supplies where average power and peak power differ greatly, with magnetic saturation kept minimum
- Toroidal construction made radiation noise low
- Wide range of frequency requirement can be fulfilled by various materials
- High saturation current
- TBC-Series is the TC with bases implemented
- **Applications:**
- Computers
- Power supplies
- EMI/FRI Suppression

WT3932 Toroidal Coil

A=20mm

B= 9 mm

C=10mm

Wire diameter 0.85mm

5A 150 μ H
